Director of Nuclear Reactor Regulation  
Attention: Mr. Robert L. Baer, Chief  
LWR Branch 2, DPM  
U. S. Nuclear Regulatory Commission  
Washington, D. C. 20555

Gentlemen:

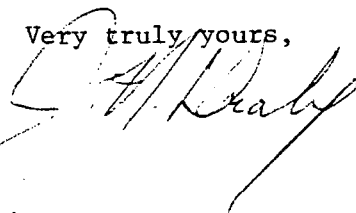

Subject: Docket Nos. 50-361 and 50-362  
San Onofre Nuclear Generating Station  
Units 2 and 3

In letters to the Office of Inspection and Enforcement dated July 12, 1979 and August 10, 1979, we identified a condition which we considered reportable in accordance with 10CFR50.55(e). This condition involves the small break loss-of-coolant-accident analysis conducted by our NSSS supplier Combustion Engineering. As it is our understanding that responsibility for review of this analysis has been transferred to Nuclear Reactor Regulation (NRR) from the Office of Inspection and Enforcement our report is hereby submitted to NRR, and detailed results of this analysis will be included in a supplement to FSAR question 212.151 in Amendment 17. Changes related to pre-operational test procedures and technical specifications will also be provided in Amendment 17 to the FSAR.

Enclosed, per your requirements, are sixty-seven (67) copies of a report entitled, "Small Break Loss of Coolant Accident Analysis, San Onofre Nuclear Generating Station, Units 2 and 3."

If you have any questions regarding this report, we would be pleased to discuss this matter with you at your convenience.

Very truly yours,

Enclosures
