I'm writing because I'm really worried about nuclear waste, and I don't think we should be encouraging nuclear energy till after this problem has been solved. If it ever is solved. It seems to me that touted solutions are untried, and that no-one wants to accommodate the waste and we should stop pretending that that will be a solution at some stage. This is terribly dangerous stuff, and we shouldn't be keeping it in temporary storage either.

Let's find alternative ways to meet our energy needs that are neither fossil-fuel based or nuclear. And while we wait for alternative ways to be more adequately developed, let's at least not aggravate the nuclear situation.

Please let's stop making nuclear waste.

Ann Karson,
5 Oak Court,
Candler Nc 28715.
