Subject: Please! no more reactors!

Docket ID No. NRC–2012–0246

We're currently on the edge of our chairs, to see what happens with the latest Fukushima caper ... taking out the hot rods. AT LEAST wait to see what happens there!! It may not be good, from the inherent danger, to the hiring policies, to the quirks of fate and nature involved!

Even IF successfully removed, WHERE WILL THEY PUT THE REACTIVE MATERIALS? THERE IS NO PLACE ON EARTH SAFE AND SECUREE (and NO NO NO don't DON"T send them into space!!!)

The Draft Generic Environmental Impact Statement is ERRONEOUS in stating a storage solution can be found in the next 60 years, give or take a few decades!

ACTS of GOD and other Fukushima's will occur. But don't invite them intp OUR planet! Let's act like global leaders and quit the nukes!

Best wishes,

Susan Sunflower
