Subject: Docket Nos. 50-361 and 50-362
Monthly Operating Reports for September 1990
San Onofre Nuclear Generating Station, Units 2 and 3

Technical Specification 6.9.1.10 to Facility Operating Licenses NPF-10 and NPF-15 for the San Onofre Nuclear Generating Station, Units 2 and 3, respectively, requires SCE provide a Monthly Operating Report for each Unit, which includes: routine operating statistics and shutdown experience; all challenges to safety valves; any changes to the Offsite Dose Calculation Manual (ODCM); and, any major changes to the radioactive waste treatment system. All covered activities are reported monthly, except for ODCM changes, which requires reporting within 90 days from the time the changes were made effective.

This letter transmits the September 1990 Monthly Operating Reports for Units 2 and 3, respectively. There were no challenges to safety valves, no changes to the ODCM, and no major changes to the Units 2 and 3 radioactive waste treatment systems, during the reporting period.

Attachment A provides revised Unit 2 "Operating Status" sheets for the July 1990 and August 1990 reports to correct a previous error involving the Gross Thermal Energy Generated. The affected portions of the sheets are appropriately noted.

If you require any additional information, please let me know.

Very truly yours,
