September 14, 1983

Director, Office of Nuclear Reactor Regulation  
Attention: Mr. George W. Knighton, Branch Chief  
Licensing Branch No. 3  
U. S. Nuclear Regulatory Commission  
Washington, D.C. 20555

Gentlemen:

Subject: Docket Nos. 50-361 and 50-362  
San Onofre Nuclear Generating Station  
Units 2 and 3

- References:
- A. NRC Generic Letter 82-33 dated December 17, 1982
  - B. SCE letter from K. P. Baskin to Mr. Darrell G. Eisenhut of the NRC dated May 13, 1983
  - C. NRC letter from George W. Knighton to Messrs. Robert Dietch (SCE) and James C. Holcombe (SDG&E) dated July 8, 1983
  - D. SCE letter from M. O. Medford to Mr. George W. Knighton of the NRC dated September 1, 1983

Reference A provided all licensees with Supplement 1 to NUREG-0737 - Requirements for Emergency Response Capability. In addition, licensees were requested to furnish the NRC a proposed schedule for completing each of the basic requirements for the items identified in the enclosures to Reference A.

Reference B provided SCE's response to the NRC's request. Reference C provided SCE with the results of the NRC's review of Reference B as it relates to the requirements of Supplement 1 to NUREG-0737 for the Detailed Control Room Design Review (CRDR) and the Safety Parameter Display System (SPDS).

Reference C states that for licensees which have previously completed activities applicable to the CRDR and SPDS, it is not the NRC's intent that those activities be repeated. However, sufficient documentation must be submitted to allow the NRC staff to evaluate the adequacy of the licensee's program for performing the CRDR and SPDS reviews. Further, it was stated that if SCE believes that the requirements of Supplement 1 to NUREG-0737 have been fulfilled, then documentation to this effect must be provided.

Reference D provided the NRC with documentation of previous SCE/NRC activities to substantiate SCE's position that the required activities with respect to the CRDR and SPDS had been completed.

September 14, 1983

During a subsequent telephone call on September 12, 1983, the NRC requested that SCE provide documentation consistent with Reference A guidelines to substantiate completion of required activities. Specifically the NRC requested that SCE provide the following information and a submittal schedule:

- 1 - CRDR Program Plan
- 2 - CRDR Summary Report
- 3 - SPDS Safety Analysis

Consistent with this request SCE will provide 1) the CRDR Program Plan by January 31, 1984, 2) the CRDR Summary Report by January 31, 1984 and 3) the SPDS Safety Analysis prior to startup following the first refueling outage for San Onofre Unit 2.

If you have any questions or comments, please let me know.

Very truly yours,

*J. D. Mercurio*
