Director, Office of Nuclear Reactor Regulation Attention: Mr. George W. Knighton, Branch Chief Licensing Branch No. 3 U.S. Nuclear Regulatory Commission Washington, D.C. 20555

Gentlemen:

Subject: Docket Nos. 50-361 and 50-362 Auxiliary Feedwater System Monthly Outage Report San Onofre Nuclear Generating Station, Units 2 and 3

Pursuant to License Condition 2.C(26) of Facility Operating License NPF-15 for San Onofre Unit 3, this submittal provides the required monthly report describing any occurrence resulting in the degradation of the Units 2 and 3 Auxiliary Feedwater Systems (AFWS). This report covers the period from December 16, 1984, to January 15, 1985. The component involved, cause of outage, outage duration, and corrective actions taken to return the equipment to operable status are listed.

During the entire reporting period Unit 3 was operating in Mode 1 with 100% AFWS availability and a component unavailability of 0%. For the same period Unit 2 was defueled for which the AFWS is not required to be operable per the Technical Specifications and the duration of equipment outages is not specified.

In accordance with License Condition 2.C(26), our next report will cover the period from January 16, 1984, to February 15, 1985.

If there are any questions regarding this report, please contact me.

Sincerely,

8502190261_850206 PDR ADOCK 05000361 PDR
