

DEC 11 1981

Docket Nos.: 50-361/362

Mr. Gerald P. Motl  
Director, Field Operations  
Chem-Nuclear Systems, Inc  
240 Stoneridge Drive - Suite 100  
Columbia, South Carolina 29210

Dear Mr. Motl:

Subject: Request for Withholding Information from Public Disclosure  
(San Onofre Nuclear Generating Station, Units 2 and 3)

By your letter dated November 10, 1981, Southern California Edison Company submitted "Process Control Program for CNSI Cement Solidification Units," CNSI Document No. SD-OP-003 and requested that it be withheld from public disclosure pursuant to 10 CFR 2.790. A non-proprietary version and your affidavit were also transmitted at that time.

Your reasons for requesting our withholding of this information were that: (a) the information in the document is customarily held in confidence by CNSI; (b) the information is not available in public sources; and (c) the information provides CNSI with a competitive economic advantage because development of the information required extensive resources, and competitors would incur similar expenditures to develop equivalent information.

We have reviewed your affidavits and material based on the requirements and criteria of 10 CFR 2.790 and have determined that CNSI SD-OP-003 above contains trade secrets, confidential, proprietary commercial or financial information.

We also have found at this time that the right of the public to be fully apprised as to the bases for and effects of the proposed action does not outweigh the demonstrated concern for protection of your competitive position. Accordingly, we have determined that the information should be withheld from public disclosure.

We therefore approve your request for withholding pursuant to Section 2.790 of 10 CFR Part 2 and are withholding the report listed above from public inspection as proprietary.

Withholding from public inspection shall not affect the right, if any, of persons properly and directly concerned to inspect the document. If the need arises, we may send copies of this information to our consultants working in this area. We will, of course, assure that the consultants have signed the appropriate agreements for handling proprietary data.

If the basis for withholding this information from public inspection should change in the future such that the information could then be made available for public inspection, you should promptly notify the NRC.

Sincerely,

Frank J. Miraglia, Chief  
Licensing Branch No. 3  
Division of Licensing
