DOCKET NO. 50-361

Amendment Application  
No. 3

SOUTHERN CALIFORNIA EDISON COMPANY, ET AL. pursuant to 10 CFR 50.90,  
hereby submit Amendment Application No. 3.

This amendment application consists of Proposed Change NPF-10-2,  
NPF-10-7, NPF-10-10, NPF-10-11, NPF-10-12, and NPF-10-13 to Technical  
Specifications incorporated in Facility Operating License No. NPF-10 as  
Appendix A. This application also contains Proposed Change NPF-10-14 to  
Section 2.C.(5)c of Facility Operating License No. NPF-10. Proposed Change  
NPF-10-2 is a request to revise Appendix A Technical Specification 3.8.4.2 to  
clarify Table 3.8-2. Proposed Change NPF-10-7 is a request to add a new  
section, Section 7.0, to Appendix A Technical Specification. Proposed Change  
NPF-10-10 identifies various editorial discrepancies, typographical errors and  
inconsistencies between Appendix A Technical Specifications. Proposed Change  
NPF-10-11 is a request to revise specified portions of Section 6.0, Appendix A  
Technical Specifications. Proposed Change NPF-10-12 is a request to revise  
Table 3.12-1, Appendix A Technical Specification 3.12.1. Proposed Change  
NPF-10-13 is a request to revise Appendix A Technical Specification 4.6.1.3.a.

8205180298

Pursuant to 10 CFR 170.22 footnote 2, Proposed Change NPF-10-7 submitted as part of Amendment Application No. 3, is exempt from these fees. In accordance with the requirements of 10 CFR 170.22, the remainder of the proposed changes included in Amendment Application No. 3, are considered to constitute a Class II Amendment. The basis for this determination is that the change has no safety or environmental significance.

Accordingly, the fee of \$1,200.00 corresponding to this determination is remitted herewith as required by 10 CFR 170.22.

Subscribed on this 14<sup>th</sup> day of May 1982.

Respectfully submitted,

SOUTHERN CALIFORNIA EDISON COMPANY

By David J. Fogarty

DESCRIPTION OF PROPOSED CHANGE NPF-10-2 AND SAFETY ANALYSIS  
AMENDMENT APPLICATION NO. 3 OPERATING LICENSING NPF-10

This is a request to revise Appendix "A" Technical Specification 3.8.4.2.

MOTOR OPERATED VALVES THERMAL OVERLOAD PROTECTION BYPASS

Existing Specification:

See Attachment "A"

Proposed Specification:

See Attachment "B".

Proposed revisions to Table 3.8-2 are as shown on Attachment "B" pages 3/4 8-32 through 8-35 of the Appendix A Technical Specifications. Three valves (HV-9377, 9378, and 9235) are being added; two valve numbers (LV-0227C and HV-8152) are being corrected and the functional description for 54 valves is being revised to agree in detail with P&ID's and instrument index.

Reason For Proposed Change:

A review of Technical Specifications 3.8.4.2 has revealed three valves inadvertently omitted from Table 3.8-2 and that the functional description for several valves requires clarification to agree with the description designated on piping and instrument drawings and the instrument index.

Safety Analysis:

The proposed change to the Technical Specifications requires surveillance of three additional valves to verify that the thermal overload protection, integral with the motor starter of each valve is permanently bypassed in accordance with Regulatory Guide 1.106, November 1975. Further changes are for clarification only. The intent of the Technical Specifications is not changed nor does this proposed change require any alteration of the physical station.

Accordingly, it is concluded that: (1) Proposed Change NPF-10-2 does not involve an unreviewed safety question as defined in 10 CFR 50.59, nor does it present significant hazard considerations not described or implicit in the Final Safety Analysis; (2) there is reasonable assurance that the health and safety of the public will not be endangered by the proposed change; and (3) this action will not result in a condition which significantly alters the impact of the station on the environment as described in the NRC Final Environmental Statement.
