Mr. H. R. Denton, Director
Office of Nuclear Reactor Regulation
U.S. Nuclear Regulatory Commission
Washington, D.C. 20555

Gentlemen:

Subject: Docket No. 50-361
Amendment Application No. 12
San Onofre Nuclear Generating Station
Unit 2

Enclosed are three executed and forty conformed copies of Amendment Application No. 12 to Operating License NPF-10 for San Onofre Nuclear Generating Station. Amendment Application No. 12 consists of Proposed Change NPF-10-42 to Facility Operating License No. NPF-10 and Appendix A, Technical Specifications.

Proposed Change NPF-10-42 is a request to revise Section 2.C(19)i of Facility Operating License NPF-10 and to revise Technical Specification 6.8.4.d. This change was submitted by letter dated September 11, 1982 and was discussed with the NRC staff at a meeting at NRC offices in Bethesda, Maryland on September 13, 1982. Supplemental information was provided to the NRC by letters dated September 14 and September 15, 1982. Approval of this change is required to permit entry into Operational Mode 1.

It is respectfully requested that Amendment Application No. 12 be reviewed promptly and appropriate action taken. Direct distribution of Application No. 12 to the Facility Operating License No. NPF-10 will be made in accordance with the service list provided by SCE's letter of August 2, 1982 to the Commission. An affidavit attesting to the fact that distribution has been completed will be submitted within ten days of amendment docketing.

The proposed changes contained in Amendment Application No. 12 are considered to constitute a Class III amendment based on the determination that these changes involve safety considerations. Accordingly, enclosed is Southern California Edison Company's check in the amount of \$4,000.00 as required by 10 CFR 170.22.

Very truly yours,

Robert Dietch
