Attention: Ms. Janis D. Kerrigan, Acting Branch Chief
Licensing Branch No. 3
U. S. Nuclear Regulatory Commission
Washington, D.C. 20555

Gentlemen:

Subject: Docket No. 50-361
San Onofre Nuclear Generating Station
Unit 2

Enclosed for your review and approval is a copy of Proposed Change NPF-10-46 to Technical Specifications 3.3.4, for San Onofre Nuclear Generating Station, Unit 2, incorporated in Facility Operating License NPF-10 as Appendix A.

On October 6, 1982 we anticipate the need to enter MODE 3 to resume startup testing. The turbine control valves are presently undergoing repairs which cannot be completed by October 6, 1982. Technical Specification 3.3.4 presently would prohibit entry into MODE 3 with these turbine control valves inoperable. This proposed change will allow entry into MODES 3 and 2 while preventing the possibility of turbine overspeed by requiring that the Main Steam Isolation Valves and the Main Steam Isolation Valve Bypasses remain closed while the Turbine Overspeed Protection System is inoperable.

A formal request for an amendment to Operating License No. NPF-10 will be transmitted to the NRC during the week of October 11, 1982. The formal request will include a check in the amount of \$1,200.00 for this change which has been determined to be a Class II change in accordance with 10 CFR 170.22.

If you have any questions concerning the enclosed information, please call me.

Very truly yours,

M. D. Medford for KPB
