September 9, 1983

Mr. H. R. Denton, Director
Office of Nuclear Reactor Regulation
U. S. Nuclear Regulatory Commission
Washington, D. C. 20555

Gentlemen:

Subject: Docket No. 50-206
Amendment No. 114
San Onofre Nuclear Generating Station
Unit 1

Enclosed are three executed and thirty-seven conformed copies of Amendment No. 114 in Docket No. 50-206. Amendment No. 114 consists of Proposed Change Nos. 123 and 124 to the Technical Specifications incorporated into Provisional Operating License No. DPR-13 as Appendices A and B.

Proposed Change No. 123 is a request to revise Appendix A Technical Specification 3.6.2, Containment Isolation Valves. This proposed change will incorporate into the Technical Specifications the NRC's interim position of maintaining the sphere purge air supply and air outlet lines locked closed during Modes 1, 2, 3 and 4.

Proposed Change 124 is a request to revise Appendix A Technical Specification 4.3, Containment Systems. This proposed change will incorporate the containment testing requirements of 10 CFR 50 Appendix J.

Pursuant to 10 CFR 170.22, Proposed Change Nos. 123 and 124 are exempt from Class III fees. These proposed changes, which result from independent written commission requests for the application, clarify the technical specifications and are issued for the convenience of the Commission. Based on these considerations, no fee is submitted herewith.

Very truly yours,

Kenneth P. Baskin
Vice President
