

UNITED STATES
NUCLEAR REGULATORY COMMISSION
WASHINGTON, D. C. 20555

August 17, 1988

Docket No. 50-206

Mr. Kenneth P. Baskin
Vice President
Southern California Edison Company
2244 Walnut Grove Avenue
Post Office Box 800
Rosemead, California 91770

Dear Mr. Baskin:

SUBJECT: ISSUANCE OF AMENDMENT NO. 106 TO PROVISIONAL OPERATING LICENSE
SAN ONOFRE NUCLEAR GENERATING STATION, UNIT NO. 1 (TAC NO. 60369)

The Commission has issued the enclosed Amendment No. 106 to Provisional Operating License No. DPR-13 for San Onofre Nuclear Generating Station, Unit No. 1. The amendment consists of changes to the Technical Specifications in response to your application dated December 19, 1985, as supplemented April 28, 1987.

The amendment reduces the number and frequency of diesel generator test starts consistent with NRC Generic Letter 84-15.

The amendment does not include the seven-day out-of-service period for one diesel generator and the cumulative 800 hours per year out-of-service time for both diesel generators. These aspects of Generic Letter 84-15, contained in its Enclosure 3, were presented only for comment and staff consideration in finalizing surveillance testing requirements for diesel generators. This activity is designated as generic issue B-56, "Diesel Generator Reliability", and is scheduled for resolution in fiscal year 1989. Accordingly, this portion of your amendment request is denied. A copy of the Notice of Denial is enclosed. However, we have forwarded your letter to the Office of Nuclear Regulatory Research for consideration of this aspect of your request.
