

APPENDIX A
NOTICE OF VIOLATION

Southern California Edison Company
San Onofre Nuclear Generating Station
Unit 1

Docket No. 50-206
License No. DPR-13

During an inspection conducted on September 6 through 30, 1988, a violation of NRC requirements was identified. In accordance with the "General Statement of Policy and Procedures for NRC Enforcement Actions," 10 CFR Part 2, Appendix C (1988), the violation is listed below:

10 CFR 20.101, Radiation dose standards for individuals in restricted areas, paragraph (a), reads, in part:

"...except as provided in paragraph (b) of this section, no licensee shall possess, use, or transfer licensed material in such a manner as to cause any individual in a restricted area to receive in any period of one calendar quarter from radioactive material and other sources of radiation a total occupational dose in excess of the standards specified in the following table:

"REMS PER CALENDAR QUARTER

- "1. Whole body; head and trunk; active bloodforming organs; lens of eyes; or gonads..... 1½"

Contrary to the above, during the third quarter of 1988 a maintenance worker acting as a fire watch at Unit 1 received a whole body dose in excess of the 1½ rem quarterly limit. The dose of approximately 1½ rem was received by the worker, primarily from an event on July 31, 1988. The exception specified in 10 CFR 20.101 (b) was not applicable in that the exposure was not planned and a Form NRC-4 or equivalent had not been completed before the dose was received.

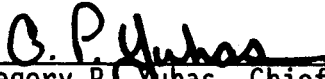

This is a Severity Level IV violation (Supplement IV).

Pursuant to the provisions of 10 CFR 2.201, Southern California Edison Company is hereby required to submit a written statement of explanation to the U.S. Nuclear Regulatory Commission, ATTN: Document Control Desk, Washington, DC 20555 with a copy to the Regional Administrator, Region V, and a copy to the NRC Resident Inspector, within 30 days of the date of the letter transmitting this Notice. This reply should be clearly marked as a "Reply to a Notice of Violation" and should include for each violation: (1) the reason for the violation if admitted, (2) the corrective steps that have been taken and the results achieved, (3) the corrective steps that will be taken to avoid further violations, and (4) the date when full compliance will be achieved. If an adequate reply is not received within the time specified in this Notice, an order may be issued to show cause why the license should not be modified, suspended, or revoked or why such other action as may be proper should not be
