**Subject:** about nuclear energy

I "get" that we must find energy sources to replace fossil fuels, and I strongly agree. What I don't understand is why, with so many possibilities for increasing renewable energy, we would spend money on nuclear energy that produces toxic waste that no one has figured out what to do with. No informed person wants it near them or their children. No informed person wants it transported near them or their children. Accidents might be rare, but they are sure to happen, and are always devastating. That is not true for renewables.

I do not want more nuclear power stations. I do want more renewable energy.

Thank you for considering my concerns.

Sincerely,

Therese MacKenzie, SHCJ  
7040 N. Sheridan Road  
Chicago, IL 60626
