Director, Office of Nuclear Reactor Regulation
Attention: D. M. Crutchfield, Chief
Operating Reactors Branch No. 5
Division of Licensing
U. S. Nuclear Regulatory Commission
Washington, D.C. 20555

Gentlemen:

Subject: Docket No. 50-206
NUREG-0737, Item II.D.1 - Performance
Testing of PWR Relief and Safety Valves
San Onofre Nuclear Generating Station
Unit 1

Reference: Letter, R. W. Krieger, SCE, to D. M. Crutchfield, NRC,
NUREG-0737, Item II.D.1 - Performance Testing of PWR
Relief and Safety Valves, June 30, 1982

The referenced letter informed you that the final evaluation necessary to determine the applicability of the Electric Power Research Institute (EPRI) program test results for the PORVs, SVs, and PORV Block Valves at San Onofre Unit 1 would not be completed until August 1, 1982. The purpose of this correspondence is to inform you that due to a need to further review the PORV and SV final evaluation, prepared for us by Westinghouse Electric Corporation, and the discharge piping adequacy report, these two reports will not be completed until mid-September, 1982. The PORV Block Valve final evaluation, being prepared for us by Westinghouse Electric Corporation, is not yet complete and is not currently expected to be completed until the first part of September, 1982. Based on the above schedule, we will provide you with the complete evaluation of the PORV's, SV's, and PORV Block Valve at San Onofre Unit 1 on September 24, 1982.

If you have any questions, please let me know.

Sincerely,

R. W. Krieger
Supervising Engineer
San Onofre Unit 1 Licensing

A046 Add: Walt Paulson
