Stacey, I apologize for getting these to you late – perhaps someone else already provided the same...

On November 15-16 EVIB staff (Carolyn Fairbanks, Jeff Poehler) met with the chairman of the Belgian regulatory working group assessing the structural integrity of the Doel 3 and Tihange 2 reactor vessels to share our views on their proposed evaluation. The meeting was coordinated by RES.

On November 28, EVIB staff (Stacey Rosenberg, Ganesh Cheruvenki, Simon Sheng, Jeff Poehler, Pat Purtscher, Dan Widrevitz) participated in a public meeting with industry representatives (EPRI, PWROG, licensees) to discuss issues with licensee's verification of the plant-specific applicability of topical report MRP-227-A with respect to reactor vessel internals inspections plans. Other applicant/licensee action items related to MRP-227-A were also discussed.

EVIB,

I need your accomplishments for November by COB today!

Thanks,  
Stacey

*... And just like that is December!! Amazing how fast this year went by.*

*Please remember that Accomplishments for November are due this coming Monday, December 3, 2012.*

Thank you | Gracias,

Carla P. Roque Cruz
