Director, Office of Nuclear Reactor Regulation
Attention: D. M. Crutchfield, Chief
Operating Reactors Branch No. 5
Division of Licensing
U. S. Nuclear Regulatory Commission
Washington, D.C. 20555

Gentlemen:

Subject: Docket 50-206
Reactor Operator Training Program
San Onofre Nuclear Generating Station
Unit 1

Reference: Letter, H. L. Ottoson, SCE, to P. F. Collins, NRC, Operator
Requalification Program, July 31, 1980

By the referenced letter we provided you with the "Operator Requalification Program" for San Onofre Unit 1. As a result of a recent telephone conversation with members of your staff we are providing additional information about the licensed operator initial training program.

The attached training memorandum and addendum to the training program (Enclosure 1), outline the additional criteria for initial training as a result of recent commitments. The initial training program also encompasses the control manipulations and topics similar to those outlined in the "Operator Requalification Program".

The current revision to the "Operator Requalification Program" is also attached for your information (Enclosure 2). Section 7.0 is a new section covering the requalification requirements for those licensed individuals who have not been active in licensed duties for a period of four (4) months or longer. This addition was necessary to properly address the requirements of 10CFR55.31(e).

If you have any questions, please let me know.

Very truly yours,

R. W. Krueger
for K. P. Baskin

NUCLEAR TRAINING DIVISION

TRAINING MEMORANDUM 20-81

November 25, 1981

TO: DISTRIBUTION

SUBJECT: NUCLEAR OPERATOR TRAINING AND REQUALIFICATION PROGRAMS, SAN ONOFRE UNIT 1 OR UNITS 2&3

PURPOSE

The purpose of this memorandum is to set forth information regarding nuclear operator training programs.

DISCUSSION

General post TMI training programs have been developed which outline the training plans for the following operating positions:

Nuclear Plant Equipment Operator
Reactor Operator
Senior Reactor Operator
Watch Engineer

These programs are available in the Nuclear Training Division for reference or review under the title of "Nuclear Operator Training and Requalification Programs".

Preparation of specific program material is under development and will be published when available.

W. G. Zintl

FPR:tlw/1859A

ADDITIONAL TRAINING FILES
TO BE INCLUDED IN LICENSED OPERATOR
INITIAL TRAINING PROGRAM

As NRC requirements and commitments continue to increase training requirements the purpose of this document is to list those new training requirements that need to be incorporated in the initial operator training program. This document will be an addendum to this training program to insure that all requirements get incorporated. This will only document new subjects and systems. Revisions to existing systems and procedures will be covered by requiring that all design changes are added to lesson materials and only current controlled copies of procedures are used during lessons.

<u>Subject</u>	<u>Phase of Training Subject Is To Be Covered</u>
Accident and Transient Analysis	III
Core Damage Mitigation	V
Heat Transfer, Fluid Flow and Thermodynamics	I and V
Steam Generator Overfill	V
Pressurized Thermal Shock	III (with procedure on Loss of Coolant)
