Gentlemen:

Subject: Docket Nos. 50-206, 50-361, and 50-362  
Response to NRC Generic Letter 90-03,  
"Relaxation of Staff Position in Generic Letter 83-28, Item 2.2  
Part 2 'Vendor Interface for Safety-Related Components'"  
San Onofre Nuclear Generating Station  
Units 1, 2, and 3

This letter provides Southern California Edison's (SCE's) response to NRC Generic Letter 90-03, "Relaxation of Staff Position in Generic Letter 83-28, Item 2.2 Part 2, 'Vendor Interface for Safety Related Components'" for San Onofre Units 1, 2, and 3.

NRC Generic Letter 90-03 requested Licensees to review their present vendor interface programs and modify their programs, if necessary, to assure that their vendor interface programs include:

- " (a) A program with the NSSS vendor as described in the VETIP (Vendor Equipment Technical Information Program), which covers all the safety-related components within the NSSS scope of supply. This program should include provisions for assuring receipt by the licensee/applicant of all technical information provided by the NSSS vendor; and
- (b) A program of periodic contact with the vendors of other key safety-related components not included in (a) above."

A complete description of our vendor interface program was forwarded to the NRC by letter dated May 31, 1984. That letter provided SCE's response to NRC Generic Letter 83-28, Section 2.2 Part 2 - Vendor Interface Program for San Onofre Units 1, 2, and 3 and endorsed the approach to vendor interface programs documented in the VETIP report. Our existing vendor interface program conforms with the program outlined in the VETIP report and satisfies the requirements of item (a) above.

We are implementing measures to conform with the requirements of item (b) above. We anticipate that our program will conform to the requirements of Generic Letter 90-03 by the middle of 1991.

If you have any questions, please contact me.

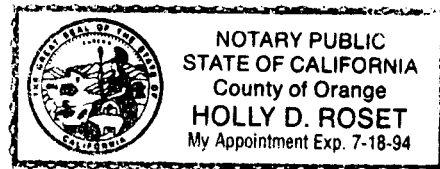

Very truly yours,

Subscribed and sworn to before me this  
24 day of September, 1990.
