Dear Gentlemen:

SUBJECT: RESPONSE TO GENERIC LETTER 90-03 - SAN ONOFRE NUCLEAR GENERATING STATION, UNIT NOS. 1, 2 AND 3 (TAC NOS. 76288, 76289 AND 76290)

NRC Generic Letter 90-03 requested licensees to review their present vendor interface programs and modify their programs, if necessary, to assure that their vendor interface programs include:

- (a) A program with the NSSS vendor as described in the VETIP (Vendor Equipment Technical Information Program), which covers all the safety-related components within the NSSS scope of supply. This program should include provisions for assuring receipt by the licensee/applicant of all technical information provided by the NSSS vendor; and
- (b) A program of periodic contact with the vendors of other key safety-related components not included in (a) above.

In your letter dated September 25, 1990, you stated that a complete description of your vendor interface program was forwarded to the NRC by letter dated May 31, 1984. That letter provided SCE's response to NRC Generic Letter 83-28, Section 2.2 Part 2 - Vendor Interface Program for San Onofre Units 1, 2, and 3, and endorsed the approach to vendor interface programs documented in the VETIP report. Your letter also stated that your existing vendor interface program conforms with the program outlined in the VETIP report and satisfies the requirements of item (a) above. Additionally, your response to the generic letter stated that you are implementing measures to satisfy the requirement of item (b) above and that you will fully conform with that requirement by the middle of 1991.

The staff has reviewed your response to GL 90-03, and we consider your resolution of this issue to be acceptable. However you are requested to contact us if your schedule for fully conforming with item (b) above should change.

Sincerely,
