Gentlemen:

Subject: Docket No. 50-206
Provisional Operating License No. DPR-13
Amendment No. 77
San Onofre Nuclear Generating Station
Unit 1

By letter dated April 18, 1979, we submitted Amendment No. 77 in Docket No. 50-206. Amendment No. 77 consists of Proposed Change No. 77 to the Technical Specifications incorporated in the above-numbered license. Proposed Change No. 77 reflects San Onofre Unit 1 and corporate reorganization changes.

The corporate reorganization changes are reflected in Figure 6.2.1.1 (Appendix A Technical Specifications) and Figure 5.2-1 (Appendix B Environmental Technical Specifications) of Proposed Change No. 77. In order to incorporate a recently announced corporate level organization change, these figures have been revised to reflect a change in reporting relationship between the Vice President (Power Supply) and Senior Vice President. In addition, the figures reflect a change in the reporting relationship between the Nuclear Control Board and the Senior Vice President.

Enclosed are forty copies each of revised Figures 6.2.1.1 and 5.2-1 which supersede the corresponding figures of Proposed Change No. 77. In accordance with Technical Specification requirements, the enclosed figures have been reviewed and approved by the San Onofre Unit 1 review committees and are incorporated into and made a part of Proposed Change No. 77 herein by reference.
