U. S. Nuclear Regulatory Commission
Washington, D. C. 20555

Gentlemen:

Subject: Docket No. 50-206
Provisional Operating License No. DPR-13
Amendment No. 84
San Onofre Nuclear Generating Station
Unit 1

Enclosed are three (3) executed and thirty-seven (37) conformed copies of Amendment 84 in Docket No. 50-206. Amendment No. 84 consists of Proposed Change No. 83 to the Technical Specifications incorporated into the above-numbered license as Appendices A and B.

Proposed Change No. 83 incorporates radiological effluent technical specifications which implement the requirements of 10CFR50 Appendix I. These technical specifications are based on the NRC guidance provided in NUREG 0472, Draft Radiological Effluent Technical Specifications for PWR's, Revision 1, dated October 1978 and NUREG 0133, Preparation of Radiological Effluent Technical Specifications for Nuclear Power Plants, dated October 1978.

Since NUREG 0472 is in a Standard Technical Specification format it was necessary to revise the technical specifications provided in NUREG 0472 to the format of the San Onofre Unit 1 Technical Specifications. The technical specifications were also modified to comply with the San Onofre Unit 1 plant design.
