Amendment No. 90.

This amendment consists of Proposed Change Nos. 91 and
92 to the Technical Specifications incorporated in Provisional
Operating License No. DPR-13 as Appendices A and B.

Proposed Change No. 91 is a request to modify the
existing Technical Specifications to describe the offsite power
sources to the station which will be operational at the completion
of the cutover to the new switchyard which is under construction
in conjunction with San Onofre Units 2&3.

Proposed Change No. 92 is a request to modify the
existing Technical Specifications to incorporate the changes

Accordingly, it is concluded that (1) the proposed changes do not involve an unreviewed safety question as defined in 10CFR50.59, nor do they present significant hazards considerations not described or implicit in the Final Safety Analysis, and (2) there is a reasonable assurance that the health and safety of the public will not be endangered by the proposed change.

Pursuant to 10 CFR 170.22, Proposed Change Nos. 91 and 92 submitted as Amendment No. 90 are determined to be Class III changes. The basis for this determination is that each proposed change involves a single safety issue and is deemed not to involve a significant hazards consideration. As indicated in the document entitled, "Guidance for Assessing the Proper Licensing Fee" which was transmitted by letter dated July 12, 1979, when a single amendment contains no more than three Class III safety issues they will be assessed as separate Class III fee types and not as a Class IV fee.

Accordingly, the fee of \$8,000.00 corresponding to this determination is remitted herewith as required by 10 CFR 170.22.
