Docket No. 50-206

Southern California Edison Company
P. O. Box 800
2244 Walnut Grove Avenue
Rosemead, California 91770

Attention: Dr. L. T. Papay
Vice President, Advanced
Engineering

Gentlemen:

Subject: NRC Regional Evaluation of Licensee Performance - San Onofre 1

This refers to the meeting held at Southern California Edison (SCE) Company offices in Rosemead, California, on July 15, 1980, between Mr. R. H. Engelken and members of the Region V staff with Dr. Papay, Mr. R. Dietch and others of the SCE staff. The purpose of this meeting was to discuss the results of NRC's regional evaluation of licensee performance for those activities authorized by NRC License No. DPR-13. A copy of this evaluation and supporting data are enclosed.

Results of this, the first of NRC's planned Systematic Appraisal of Licensee Performance (SALP) evaluations conducted with regard to the San Onofre 1 facility, reveal areas which, although not of serious concern at this time, we plan to increase the frequency and/or scope of our future inspection activities. We feel these areas, identified in the enclosed evaluation, represent areas where you should direct particular management attention as well. In addition, activities associated with the current refueling and maintenance shutdown, especially ongoing inspections and repairs to the steam generators, we feel warrant your continuing special attention to radiation protection measures for those personnel involved.

In accordance with Section 2.790 of the NRC's "Rules of Practice," Part 2, Title 10, Code of Federal Regulations, a copy of this letter and its enclosures will be placed in the NRC's Public Document Rooms.
