ROBERT DIETCH
VICE PRESIDENT

December 1, 1980

Mr. H. R. Denton, Director
Office of Nuclear Reactor Regulation
U. S. Nuclear Regulatory Commission
Washington, D. C. 20555

Gentlemen:

Subject: Docket No. 50-206
Amendment No. 94
San Onofre Nuclear Generating Station
Unit 1

Enclosed are three executed and thirty-seven conformed copies of Amendment No. 94 in Docket No. 50-206. Amendment No. 94 consists of Proposed Change No. 96 to the Technical Specifications incorporated into Provisional Operating License No. DPR-13 as Appendix A.

Proposed Change No. 96 is a request to modify the Technical Specifications to provide for redundancy in decay heat removal capability in all modes of operation. By letter dated June 11, 1980, the Division of Licensing requested all operating pressurized water reactors to submit proposed technical specifications for that purpose. This proposed change is in compliance with that direction.

As part of this proposed change, operational modes have been defined to conform more closely to the definitions of the Standard Technical Specifications; in conjunction, the station procedures are being revised to accommodate these definitions. Accordingly, it is requested that the NRC review proposed Change No. 96 and take appropriate action prior to January 1, 1981, which is the intended effective date of the revised procedures.

Also enclosed is Southern California Edison Company's Check No. T019609 dated November 24, 1980, in the amount of \$4,000.00 as required by 10 CFR 170.22.

Very truly yours,

Robert Dietch

BEFORE THE UNITED STATES NUCLEAR REGULATORY COMMISSION

Application of SOUTHERN CALIFORNIA EDISON)
COMPANY and SAN DIEGO GAS & ELECTRIC COMPANY)
for a Class 104(b) License to Acquire,) DOCKET NO. 50-206
Possess, and Use a Utilization Facility as)
Part of Unit No. 1 of the San Onofre Nuclear) Amendment No. 94
Generating Station)

SOUTHERN CALIFORNIA EDISON COMPANY and SAN DIEGO GAS
& ELECTRIC COMPANY, pursuant to 10 CFR 50.90, hereby submit
Amendment No. 94.

This amendment consists of Proposed Change No. 96 to
the Technical Specifications incorporated in Provisional
Operating License No. DPR-13 as Appendices A and B.

Proposed Change No. 96 is a request (1) to revise the
Technical Specifications to provide for redundancy in decay
heat removal capability in all modes of operation, (2) to
define operational modes to conform more closely to the
Standard Technical Specifications, and (3) to revise certain
existing Technical Specifications and Proposed Changes as
necessitated by the definition of operational modes.

In the event of conflict, the information in this
Amendment No. 94 supersedes the information previously
submitted.

Accordingly, it is concluded that (1) the proposed change does not involve an unreviewed safety question as defined in 10 CFR 50.59, nor does it present significant hazards considerations not described or implicit in the Final Safety Analysis, and (2) there is a reasonable assurance that the health and safety of the public will not be endangered by the proposed change.

Pursuant to 10 CFR 170.22, Proposed Change No. 96 submitted as Amendment No. 94 is determined to be a Class III change. The basis for this determination is that this proposed change involves a single safety issue, has acceptability for the issue clearly identified by an NRC position, and is deemed not to involve a significant hazards consideration.

Accordingly, the fee of \$4,000.00 corresponding to this determination is remitted herewith as required by 10 CFR 170.22.

Subscribed on this 24th day of November 1980.

Respectfully submitted,

SOUTHERN CALIFORNIA EDISON COMPANY
