Mr. Harold R. Denton, Director
Office of Nuclear Reactor Regulation
U. S. Nuclear Regulatory Commission
Washington, D. C. 20555

Attention: Mr. Darrell G. Eisenhut

Dear Mr. Denton:

Subject: Docket Nos. 50-361 and 50-362
San Onofre Nuclear Generating Station
Units 2 and 3

The purpose of this letter is to follow-up on commitments made to the Nuclear Regulatory Commission (NRC) by the Southern California Edison Company (SCE) during a recent series of meetings held at the offices of General Atomic Company (GA).

Transmitted as enclosures to this letter are seven copies of the following documents:

1. Procurement Change Notice No. 1 to SCE P.O.
No. S4100185 TPT-GA

This document confirms SCE's commitment by authorizing GA to perform a physical verification of a representative segment of work in the field. This work will be completed and the results included in the Interim Report to be submitted on January 25, 1982.

2. Revision 1 of SCE Administrative Procedure for Resolution of Findings

This revision allows the transmittal of Potential Finding Reports to the NRC as requested by your staff.

PDR

January 14, 1982

3. Potential Finding Reports Nos. 0001 through 0007

Please note that the Potential Finding Reports reflect the reviewer's initial opinion and have not been verified for validity or accuracy by the original design organization.

Items No. 1 and No. 2 were provided informally to the NRC on January 8, 1982 and Item No. 3 on January 13, 1982.

Regarding independent design calculations, GA is in the process of developing the basis for selecting features for such calculations and identifying those features. We will review those with you prior to the commencement of this task by GA. The results of the independent calculations will be included in the final report to the NRC on March 31, 1982.

In response to a question raised by NRC staff members, we would like to state once again that only the design bases included in the FSAR as amended to date will be the basis of the GA review.

Regarding the financial independence of GA, a letter has been requested of GA to clarify and confirm its financial independence. We will forward the letter to the NRC as soon as it is available.

If you have any questions regarding any of these matters, please call me.

Very truly yours,

A handwritten signature in cursive script, which appears to read "Robert Ditch", is written below the typed name.

QUALITY CLASS NON-SAFETY RELATED

Please refer to our Order No. S4100185 dated December 23, 1981 covering an independent verification of San Onofre Nuclear Generating Station, Units 2 and 3 seismic design and effectiveness of Quality Assurance program and add the following scope of work:

Torrey Pines Technology (TPT) shall perform field verification of a representative piping segment to demonstrate that the physical installation is in accordance with design.

Total cost not to exceed remains \$1,500,000.00

All other terms and conditions of order remain unchanged.

**ACCEPTANCE
 COPY**

No change shall be made to the price, terms and conditions, specified requirements or schedules of the referenced purchase order or this change order without express authorization of the Buyer. Additional costs resulting from work done or material supplied without such authorization may be denied.
