Director, Office of Nuclear Reactor Regulation
Attention: Ms. Janis D. Kerrigan, Acting Branch Chief
Licensing Branch No. 3
U. S. Nuclear Regulatory Commission
Washington, D.C. 20555

Gentlemen:

Subject: Docket Nos. 50-361 and 50-362
San Onofre Nuclear Generating Station
Units 2 and 3

License Condition 2.C(23)a.iv to Operating License NPF-10-42 for San Onofre Nuclear Generating Station, Unit 2 requires the installation of sirens in Dana Point and San Juan Capistrano to provide siren coverage in the "extended" plume exposure pathway EPZ. This condition must be satisfied within five (5) months of initially exceeding five (5) percent power, which occurred on September 17, 1982.

For your information, installation of the sirens is proceeding expeditiously. Upon completion of installation, the Company will conduct routine start-up tests of the sirens, including growl tests, to assure proper installation. Audibility tests of the sirens will be conducted in association with the next annual emergency planning exercise which is currently scheduled for March 23, 1983.

If you have any questions or if I can be of any assistance to you concerning the enclosed information, please contact me.

Very truly yours,

KP Baskin
