Director, Office of Nuclear Reactor Regulation
Attention: Mr. George W. Knighton, Branch Chief
Licensing Branch No. 3
U. S. Nuclear Regulatory Commission
Washington, D.C. 20555

Gentlemen:

Subject: Docket Nos. 50-361 and 50-362
San Onofre Nuclear Generating Station
Units 2 and 3

- References:
- A. Letter from K. P. Baskin (SCE) to F. A. Miraglia (NRC), dated July 1, 1981
 - B. Letter from K. P. Baskin (SCE) to F. A. Miraglia (NRC), dated March 31, 1982
 - C. NUREG-0712, Supplement No. 1, February 1982, Section 22.2.III.A.1.2(c)
 - D. Letter from K. P. Baskin (SCE) to George W. Knighton (NRC), dated October 28, 1982
 - E. NRC Facility Operating License No. NPF-10, Condition 2.C(19)s.2
 - F. NRC Facility Operating License No. NPF-15, Condition 2.C(17)j.1

The reference documents discuss the Nuclear Regulatory Commission (NRC) requirements for upgraded emergency response facilities and the Southern California Edison Company (SCE) commitments to comply with those requirements for San Onofre Nuclear Generating Station, Units 2&3 (SONGS 2&3). In particular, References E and F require the upgraded emergency support facilities for SONGS 2&3 to be operational by January 1, 1983. Reference B is a functional description of the upgraded emergency support facilities that was submitted to the NRC in compliance with License Condition 2.C(19)s.1 to Facilities Operating License NPF-10.

Boo!

December 15, 1982

The purpose of this letter is to advise the NRC that the emergency support facilities for SONGS 2&3 (as defined in References E and F) are operational. All systems and equipment in the facilities are operational with the exception of the following:

1. The red phone (NRC Emergency Notification System) and the green phone (NRC HEALTH Physics Network) are installed and operable as committed in the control room (CR), technical support center (TSC) and the NRC consultation area. However, the red and green phone will not be installed and operable in the emergency operations facility (EOF) until the end of January (January 26 per Mr. Cohen of the NRC).
2. The Critical Function Monitoring System (CFMS) is installed and operational in the CR and TSC. The CFMS terminals will be installed in the EOF by January 1, 1983. However, the EOF terminals will not be operational until the following additional work is complete:
 - a. CFMS computer hardware modification, software installation and system verification retest for Unit 2.
 - b. System verification retest for Unit 3.

The above work is dependent upon a system outage of a sufficient duration to perform the work and as such will not be accomplished until after the first of the year. It is expected that this work will be complete by March 1, 1983.

If you have any questions on this matter, please call me.

Very truly yours,

cc: H. Rood, NRC
