

U.S. NUCLEAR REGULATORY COMMISSION
TELEPHONE CONVERSATION RECORD

Date: November 12, 2013
7:40 am

Mail Control No.
582384

License No. 19-00373-02

Docket No. 030-04525

Name of Licensee: Luke Paper Company
Name of Participant(s): Bill Marley, Jr., RSO
Shawn Seeley, Health Physicist, RI DNMS
Telephone No. 301-359-3311, ext 3276
Subject: Additional information needed for renewal request 10/25/13
(NOTE: This will be used as the Documents Title in ADAMS)

I called Mr. Marley to ask him a couple of questions regarding the information contained in their renewal request.

1. The device model numbers listed on their current license do not match what they are requesting. Mr. Marley will email the list of model numbers possessed at their facilities located in West Virginia.
2. License Condition#17 lists an individual who will perform limited work around the gauges. This name was not submitted but several other names were. I told Mr. Marley we could change the condition to reflect only those individuals who have been trained according to their application. Therefore they would not have to file for an amendment each time a new user was added or someone left the company.

I told him that everything looked fine and that he should see the renewed license in a couple of weeks.

I thank him for his time and ended the call.

ACTION: Process the renewal once Mr. Marley confirms the models numbers of the devices possessed in West Virginia.
