

## APPENDIX A

Southern California Edison Company  
P. O. Box 800  
2244 Walnut Grove Avenue  
Rosemead, California 91770

Docket No. 50-206  
License No. DPR-13

### NOTICE OF VIOLATION

This refers to the investigation conducted by representatives of the Region V (San Francisco) office at San Diego, California and at the San Onofre Nuclear Generating Station - Unit 1, Camp Pendleton, California of activities authorized by NRC license DPR-13.

During this investigation conducted on April 23-25, 1980, the following apparent item of noncompliance was identified.

Technical Specification Section 6.8.1 requires that written procedures, "--- be established, implemented and maintained ---." Radiation Protection Procedure, S-VII-1.5 Access to Controlled and Exclusion Areas, states in part, "Plastic and other gloves must be removed and hands must be monitored before smoking or drinking."

Contrary to the above requirement, on April 25, two individuals were observed to be smoking in the turbine deck, drinking water-smoking area while wearing gloves. One individual was wearing cotton liner gloves and the other was wearing both cotton liner and plastic gloves.

This is an infraction.
