Docket No. 50-206
Report No. 50-206/85-20

Southern California Edison Company
P. O. Box 800
2244 Walnut Grove Avenue
Rosemead, California 91770

85-20

Attention: Kenneth P. Baskin, Vice President
Nuclear Engineering, Safety and Licensing Department

Gentlemen:

Thank you for your letter dated September 3, 1985, informing us of the steps you have taken to correct the item which we brought to your attention in our letter dated August 6, 1985. Your corrective actions will be verified during a future inspection.

Your letter requested that we reevaluate the severity level assigned to the violation, noting that the intent of regulatory requirements for dual verification of valve position had been satisfied in the instance cited. However, the Notice of Violation cited the failure of a knowledgeable supervisor (SRO) to follow approved procedures, in a manner which under other circumstances could have resulted in a lack of required dual verification. This and other recent examples of failure to follow procedures have indicated a need for additional attention to this area. After reevaluation, we have therefore concluded that the Severity Level IV assigned to this violation remains valid.

Your cooperation with us is appreciated.

Sincerely,

Original signed by
D. F. Kirsch

D. F. Kirsch, Acting Director
