NUCLEAR REGULATORY COMMISSION
WASHINGTON, D. C. 20555

March 4, 1987

Docket Nos. 50-206
50-361
and 50-362

Southern California Edison Company
ATTN: Mr. Kenneth P. Baskin
Vice President, Nuclear Engineering,
Safety and Licensing
2244 Walnut Grove Avenue
P. O. Box 800
Rosemead, California 91770

Gentlemen:

SUBJECT: Inspection Report 50-206/86-47, 50-361/86-36, and 50-362/86-35

This letter forwards the report of an inspection conducted by an NRC team on November 17-20, 1986 to review the Southern California Edison Company's fitness for duty program. This inspection was conducted jointly by members of Region V and the Office of Inspection and Enforcement. At the conclusion of the inspection, the observations were discussed at an exit meeting with those members of your staff identified in the enclosed inspection report.

The inspection report describes areas where your fitness for duty program does not appear to meet certain standards adopted by the nuclear power industry in the EEI Guide to Effective Drug and Alcohol/Fitness for Duty Policy Development. The report also describes supplemental fitness for duty program elements not contained in the EEI Guide which were reviewed by the inspection team. The NRC Policy Statement and EEI Guide describe a general approach to designing a fitness for duty program. In order to evaluate the overall effectiveness of your program and to collect information to assist the Commission in deciding future action in this area, the inspectors reviewed specific elements of the program not described in the EEI Guide such as topics for written procedures, cutoff limits for chemical testing, and program performance data. Our review of these areas is not intended to imply that they are or may become requirements. Instead, the data provides information for the staff on the various programs being adopted by licensees in support of the Commission's policy.

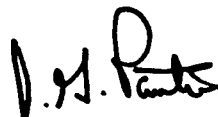

Within 60 days of receipt of this letter, it is requested that you provide this office with any comments concerning the results of our review, including a description of your planned actions to further incorporate appropriate provisions of the EEI guidelines on fitness for duty. Your special attention is directed to the first three observations addressed in the Inspection Summary.
