

JUL 24 1987

Docket Nos. 50-206, 50-361, 50-362

Southern California Edison Company
P. O. Box 800
2244 Walnut Grove Avenue
Rosemead, California 92770

Attention: Mr. Kenneth P. Baskin, Vice President
Nuclear Engineering Safety and Licensing

Gentlemen:

This refers to the routine inspection conducted by Messrs. F. R. Huey, J. E. Tatum, and A. L. Hon of this office during the period of April 4, 1987 through May 23, 1987 of activities authorized by NRC License Nos. DPR-13, NPF-10 and NPF-15 and to the discussion of our findings held by the inspectors with Mr. H. B. Ray and other members of the Southern California Edison (SCE) staff at the conclusion of the inspection.

Areas examined during this inspection are described in the enclosed inspection report. Within these areas, the inspection consisted of selective examinations of procedures and representative records, interviews with personnel, and observations by the inspectors.

Paragraph 8.b the enclosed inspection report describes several examples of licensee event reports (LERs) which do not appear to thoroughly or properly address all significant aspects of the specific events. In some instances, it may be that SCE did take appropriate actions to properly address all significant aspects, although these actions were not adequately described in the LER. To this extent, in your response to this memorandum, please identify in which instances you conclude that additional evaluation or actions were warranted as opposed to those instances in which only the reporting was deficient. Also, please identify what actions are being taken to supplement these LERs and ensure that future LERs properly reflect the SCE commitment to thorough root cause evaluation.

Based on the results of this inspection, it appears that certain of your activities were not conducted in full compliance with NRC requirements, as set forth in the Notice of Violation, enclosed herewith as Appendix A.

Your response to this Notice is to be submitted in accordance with the provisions of 10 CFR 2.201 as stated in Appendix A, Notice of Violation.

In accordance with 10 CFR 2.790(a), a copy of this letter, the enclosure, and your response will be placed in the NRC Public Document Room.

The responses directed by this letter and the accompanying Notice are not subject to the clearance procedures of the Office of Management and Budget as required by the Paperwork Reduction Act of 1980, PL 96-511.

Should you have any questions concerning this inspection, we will be glad to discuss them with you.

Sincerely,

original signed

A. E. Chaffee, Acting Chief
Reactor Projects Branch
