South Texas Project
Units 3 and 4
Docket Nos. 52-012 and 52-013
Clarification to Combined License Information Item 6.6.9.1

During the NRC Staff review of the Combined License Application (COLA) Part 2, Tier 2, Section 3.9.7.3, "Pump and Valve Testing Program," it was noted that the words "operating license" were used describing the timeframe for the inservice tests to verify operational readiness of pump and valves as noted in the Design Certification Document for COL License Information Item 6.6.9.1. The COLA reference to "operating license" is being revised to reflect the latest words specific to Title 10 CFR 50.55a, "Codes and Standards" as applied to combined license (Part 52) applications. Section 3.9.7.3 will be revised in COLA Revision 10 as follows:

As is described for ISI in COL License Information item 6.6.9.1, inservice tests to verify operational readiness of pumps and valves, whose function is required for safety, conducted during the initial 120-month interval must comply with the requirements in the latest edition and addenda of the Code incorporated by reference in 10 CFR 50.55a(b) of this section on the date 12 months before the date of issuance of the operating license scheduled for initial loading fuel under a combined license (or the optional ASME Code cases listed in NRC Regulatory Guide 1.192 that is incorporated by reference in 10 CFR 50.55a(b) of this section), subject to the limitations and modifications listed in 10 CFR 50.55a(b) of this section.

There are no commitments in this letter.

If you have any questions, please contact me at (979) 316-3011 or Bill Mookhoek at (979) 316-3014.

I declare under penalty of perjury that the foregoing is true and correct.

Executed on LO(23/13
