SUBJECT: SUMMARY OF OCTOBER 28 PUBLIC MEETING IN CHELMSFORD,
MASSACHUSETTS, TO RECEIVE COMMENTS ON THE WASTE
CONFIDENCE DRAFT GENERIC ENVIRONMENTAL IMPACT
STATEMENT AND PROPOSED RULE

On Monday, October 28, 2013, members of the U.S. Nuclear Regulatory Commission (NRC) staff held a Category 3 public meeting at the Radisson Hotel and Suites Chelmsford-Lowell in Chelmsford, MA. The purpose of the meeting was to provide an overview of the Waste Confidence draft generic environmental impact statement (DGEIS) and proposed rule, and to accept public comments on the documents. Participants also had an opportunity to ask questions about the NRC's environmental review and rulemaking process.

The NRC conducted an open house beginning at 6:00 p.m. EDT where members of the public met informally with NRC staff and asked questions related to the DGEIS and proposed rule. The public meeting began at 7:00 p.m. EDT and concluded at 10:30 p.m. EDT. The meeting began with an introduction of NRC staff and a review of meeting ground rules, followed by a short presentation on the Waste Confidence DGEIS and proposed rule. The majority of the meeting was dedicated to receiving comments from members of the public.

The staff's slide presentation is available in the NRC's Agencywide Document Management and Access System (ADAMS) under Accession No. ML13273A339. The transcript for the meeting is available in ADAMS under Accession No. ML13310B069. NRC handouts available at the meeting can be accessed at ML13319A111, ML13319A108, and ML13319A110. Posters displayed during the open house can be accessed at ML13279A004. The ADAMS Public Electronic Reading Room is accessible at <http://www.nrc.gov/reading-rm/adams.html>. Persons who do not have access to ADAMS, or who encounter problems in accessing documents

For convenience, web links to the staff's presentation materials and the meeting transcript are also available on the Waste Confidence Directorate's website at <http://www.nrc.gov/waste/spent-fuel-storage/wcd/pub-involve.html>.

Approximately 79 people attended the meeting and 37 provided comments. Meeting participants included members of the public, representatives of State and local government from Massachusetts, Maine, New Hampshire, and New York, and members of industry and public advocacy groups. A list of meeting participants is included as Attachment 1.

Questions asked during the question-and-answer period concerned the three deficiencies identified by U.S. Court of Appeals in the 2010 Waste Confidence rulemaking, and the U.S. Environmental Protection Agency's review of the DGEIS. Topics and concerns raised during the public comment portion of the meeting included: support for the no-action alternative and evaluating Waste Confidence on a site-specific basis; support for continuing the NRC's current halt on licensing and relicensing; support for phasing out nuclear power and replacing that generation with renewable energy; general opposition to nuclear power; opposition to the term "Waste Confidence"; support for expedited transfer of spent fuel from fuel pools to hardened onsite storage (HOSS); concerns regarding spent fuel pool density and spent fuel pool accidents caused by earthquakes and tsunamis, similar to Fukushima; concerns about the safety of storing spent nuclear fuel, including potential impacts from climate change, natural events like flooding, and terrorism; critique of the NRC's analysis of risks from spent fuel pool fires; opposition to transporting spent nuclear fuel; the financial cost of decommissioning; health effects of radiation; concerns about local plants including Pilgrim, Seabrook, and Vermont Yankee; and support for the Waste Confidence rulemaking, the safe storage of spent nuclear fuel, and a permanent geologic repository.
