Enough already. Let's move forward, leave the hazardous waste of old fuels behind.

If we spent 1/2 the energy on new development that is spent foolishly haggling over who has the right to poison who (for handsome profits, of course) then we'd be light-years ahead in our energy and conservation efforts evolution by now!

It's a no-brainer, close that old nuclear plant NOW and move on to clean, safe renewables.

Thank you,
Melissa Bird
