E. Saito	GE-Hitachi

**DISCUSSION:**

After introductions, the U.S. Nuclear Regulatory Commission (NRC) staff reviewed discussion topics with the GE-Hitachi staff to provide clarifications on the information of interest to the NRC physical security staff concerning Special Nuclear Material (SNM) - 960 license. The discussion topics are attached and contain security-related information. GE-Hitachi staff understood NRC's information needs and agreed to host a site visit at the Vallecitos Nuclear Center (VNC) in Sunol, California to further discuss these topics. During the teleconference, the site visit was scheduled for December 17 to 18, 2013. The site visit will include an overview of the VNC site, an update on the consolidation effort, a site tour focused on physical security, and a discussion of the topics of interest.
