Gentlemen:

Subject: Docket No. 50-206  
SEP Topic III-6  
Seismic Design Considerations  
San Onofre Nuclear Generating Station  
Unit 1

The purpose of this letter is to submit the enclosed report entitled, "Electrical Raceway Support Implementation Plan for Return to Service, San Onofre Nuclear Generating Station, Unit 1," dated September 1984. The report describes the electrical raceway support seismic reevaluation and upgrade plan which is being implemented as part of our return to service efforts at San Onofre Unit 1. The report also provides the basis for concluding that with the implementation of the identified modifications to raceway supports, the raceway system will have a seismic withstand capability of .67g without impairment of the overall integrity of the system and without impairment of the capability to achieve and maintain hot standby conditions.

If you have any questions or desire additional information regarding this subject, please contact me.

Very truly yours,

Enclosure
