

UNITED STATES  
NUCLEAR REGULATORY COMMISSION  
WASHINGTON, D. C. 20555

December 27, 1984

Docket Nos. 206/361/362  
LS05-84-12-022

LICENSEE: Southern California Edison Company  
FACILITIES: San Onofre Nuclear Generating Station, Units 1, 2, and 3  
SUBJECT: Summary of December 11, 1984 Meeting

On December 11, 1984, a meeting was held between representatives of Southern California Edison Company (SCE) and members of the NRC staff. The purpose of the meeting was to discuss the licensee's responses to the staff's September 4, 1984, request for additional information regarding proposed technical specification changes on administrative controls. A list of attendees is enclosed.

The staff found the licensee's responses generally acceptable. SCE plans to provide revised submittals by the end of December for NRC review and approval. The staff agreed to pursue with NRC management the acceptability of the licensee revising offsite management and technical support organizations without prior NRC approval provided that the revised organization chart is included with a subsequent license amendment request.
