Director, Office of Nuclear Reactor Regulation
Attention: Mr. J. A. Zwolinski, Chief
Operating Reactors Branch No. 5
Division of Licensing
U. S. Nuclear Regulatory Commission
Washington, D.C. 20555

Gentlemen:

Subject: Docket No. 50-206
Auxiliary Transformer Tap Settings Optimization
San Onofre Nuclear Generating Station
Unit 1

Reference: Letter from M. O. Medford, SCE to J. A. Zwolinski, NRC,
Auxiliary Transformer Tap Settings Optimization,
December 20, 1984

The referenced letter confirmed SCE's commitment to perform a voltage monitoring program to evaluate the tap settings chosen as a result of the tap setting optimization study. The results of this program were to be forwarded to the NRC by February 22, 1985. The voltage monitoring program has been completed and SCE has begun analyzing the results. However, in order to properly evaluate the tap settings, SCE will require additional time to analyze the results of the voltage monitoring program. Therefore, the results will be forwarded to you by March 30, 1985.

If you have any questions, please contact me.

Very truly yours,

M. O. Medford
