Docket No.: 50-206
LS05-85-05-003

Mr. Kenneth P. Baskin, Vice President
Nuclear Engineering
Safety and Licensing Department
Southern California Edison Company
2244 Walnut Grove Avenue
Post Office Box 800
Rosemead, California 91770

Dear Mr. Baskin:

SUBJECT: SAN ONOFRE NUCLEAR GENERATING STATION, UNIT 1 - DRAFT " - SEE
(NUREG-0829) INTEGRATED PLANT SAFETY ASSESSMENT REPORT REPORTS "

A copy of our Draft Report, NUREG-0829, the Integrated Plant Safety Assessment report, for the San Onofre Nuclear Generating Station, Unit 1 is enclosed. The report documents our review completed under the Systematic Evaluation Program.

The review has provided for (1) an assessment of the significance of differences between current technical positions on selected safety issues and those that existed when the San Onofre, Unit 1 plant was licensed, (2) a basis for deciding on how these differences should be resolved in an integrated plant review, and (3) a documented evaluation of plant safety. Equipment and procedural changes have been identified as a result of the review. It is expected that the final version of this report and its supplements will form part of the bases for considering the issuance of a full-term operating license in place of the existing provisional operating license.

Also enclosed is a related Notice of Availability which has been forwarded to the Office of the Federal Register for publication.

Sincerely,

Original signed by/
