Attention: Mr. J. B. Martin, Regional Administrator

Dear Sir:

Subject: Docket Nos. 50-206, 50-361 and 50-362
Special Report
San Onofre Nuclear Generating Station Units 1, 2 and 3

Pursuant to Section 3.18.2, Action Statement B.1, of Appendix A, Technical Specifications, to Provisional Operating License No. DPR-13 for San Onofre Unit 1 and Section 3.12.2, Action Statement 'a' of Appendix A, Technical Specifications to Facility Operating License Nos. NPF-10 and NPF-15 for San Onofre Units 2 and 3, respectively, this submittal provides the required 30-day written Special Report for conditions identified during 1985 Annual Land Use Census.

The Preliminary Land Use Census received by SCE on July 12 confirms identification of several new sector locations. These locations are for "residences" and "work locations" at a closer distance to San Onofre than previous locations.

The new locations, from the Unit 2 and 3 midpoint, include expansion of the San Onofre Heights residential area into sector Q at a distance of 1.5 miles and four working locations: a Gas Station in sector A at a distance of 4.1 miles, a Sanitary Landfill in sector B at a distance of 2.1 miles, a Sewage Treatment Facility in sector C at a distance of 2.2 miles, and a Sewage Treatment Facility in sector D at a distance of 3.7 miles. Dose calculations indicate that these new locations will result in only minimal dose impact. These changes will be reflected in the Offsite Dose Calculation Manuals (ODCM's). Reports of the resulting changes to the ODCM's will be submitted to the NRC in accordance with Technical Specification 6.17.2.1 for San Onofre Unit 1 and Technical Specification 6.14.2.1 for San Onofre Units 2 and 3.

Please contact me if you have any questions.

Very truly yours,
