Mr. H. R. Denton
Director, Office of Nuclear Reactor Regulation
U. S. Nuclear Regulatory Commission
Washington, D. C. 20555

Gentlemen:

Subject: Docket Nos. 50-206, 50-361 and 50-362
San Onofre Nuclear Generating Station
Units 1, 2 and 3

In accordance with 10 CFR 50.71, Southern California Edison Company (SCE) is transmitting Revision 2 to the San Onofre Nuclear Generation Station Units 1, 2 and 3 Updated Fire Hazards Analysis (UFHA). This annual revision includes additional information which amplifies, clarifies or updates the existing text and reflects all changes made in the San Onofre Units 2 and 3 facility up to a maximum of six months prior to the date of this filing. The revision consists of a complete reissue of the UFHA sections pertaining to San Onofre Units 2 and 3 to expedite incorporation of changes. Each revised page includes both a vertical change bar drawn in the margin adjacent to the changed portion and the date of the revision. This revision does not alter any conclusions drawn in the UFHA regarding the safe shutdown capability in the event of a fire for San Onofre Units 1, 2 and 3. This submittal fulfills the requirements of 10 CFR 50.71 (e) for San Onofre Units 2 and 3.

As part of the NRC Systematic Evaluation Program (SEP), San Onofre Unit 1 is not required to meet the schedular constraints of 10 CFR 50.71. However, San Onofre Unit 1 has committed to update the Unit 1 portions of the UFHA. The Unit 1 specific information is currently being revised to reflect the efforts underway to achieve compliance with the safe shutdown requirements of Part III.G of Appendix R to 10 CFR 50, as discussed in our letter dated April 24, 1984. The transmittal of this information to the NRC is expected in mid-1986.

COMPANY for a Class 104(b) License)	DOCKET NO. 50-206 Unit 1
to Acquire, Possess, and Use a Utilization)	UPDATED FHA REVISION 2
Facility as Part of Unit No. 1 of the)	
San Onofre Nuclear Generating Station)	

SOUTHERN CALIFORNIA EDISON COMPANY and SAN DIEGO GAS & ELECTRIC

COMPANY hereby submit Revision 2 to the Updated Fire Hazards Analysis (UFHA) for San Onofre Nuclear Generating Station, Units 1, 2 and 3. This revision to the UFHA includes additional information which amplifies, clarifies or updates the original text and reflects all changes up to a maximum of 6 months prior to the date of this filing for San Onofre Units 2 and 3. This submittal fulfills the requirements of 10 CFR 50.71(e) for both San Onofre Unit 2 and Unit 3.

As part of the NRC Systematic Evaluation Program (SEP), San Onofre Unit 1 is not required to meet the schedular constraints of 10 CFR 50.71. However, San Onofre Unit 1 has committed to update the Unit 1 portions of the UFHA to reflect changes made to the as-built facility. The Unit 1 specific information is currently being revised to reflect the efforts underway to achieve compliance with the safe shutdown requirements of Part III.G of Appendix R to 10 CFR 50. The transmittal of this information to the NRC is expected in mid-1986.

The information included in this revision supersedes and replaces the previously issued UFHA information.

Subscribed on this 13th day of February 1986.

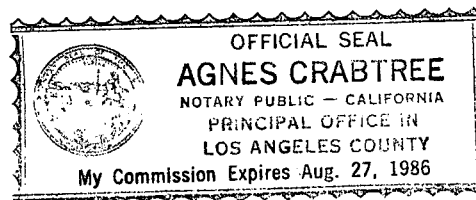

Respectfully submitted,

SOUTHERN CALIFORNIA EDISON COMPANY
