Director, Office of Nuclear Reactor Regulation
Attention: G. E. Lear, Director
PWR Project Directorate No. 1
U. S. Nuclear Regulatory Commission
Washington, D.C. 20555

Gentlemen:

Subject: Docket No. 50-206
Small Bore Piping Criteria and
Electrical Raceway Report
SEP Topic III-6, Seismic Design Considerations
San Onofre Nuclear Generating Station
Unit 1

The purpose of this letter is to submit the following two reports related to the seismic reevaluation of San Onofre Unit 1:

- (1) Review and development of Small Bore Piping and Tubing criteria, March 1986
- (2) Electrical Raceway Supports Seismic Reevaluation Program, March 1986

The enclosed report on small bore piping criteria supercedes the report, which was previously submitted by letter dated April 30, 1985, and incorporates comments made by the NRC staff and its consultants during the reviews and audit meetings. The electrical raceway report documents the seismic reevaluation of raceways at San Onofre Unit 1 which were audited by the NRC staff and its consultants over the last several months.

If you have any questions regarding our comments, please call me.

Very truly yours,

M. O. Medford
