Dennis:

Thank you for the information regarding Lutheran's submission. I was not previously advised or the requested Preceptors Statements would have been included.

Lutheran will resubmit this amendment request when Preceptor Statements are completed.

Thanks Again!! Tom K.

Dear Mr. Kumpuris –

This is in follow-up to the request provided telephonically on September 17, 2013, regarding the licensee's letter dated August 23, 2013, requesting amendment to NRC License No. 13-01535-01. In that letter, the licensee requested that Andrew Joseph Norton, M.D. and Eric Bekkers, M.D. be added to the license as authorized users for 35.100, 35.200, 35.300 (limited to oral administration of sodium iodide-131 in quantities less than or greater than 30 millicuries) materials and uses.

As stated previously, in order for us to continue processing your request, we request that you please submit a completed Form 313A(AUD) and a Form 313A(AUT) for each of the proposed authorized users. It will not be necessary for you to resubmit copies of the ABR certificates that were submitted with the original request.

For your use, I am providing links to the appropriate forms for your use, along with the link to the NRC guide, NUREG-1556, Volume 9, (rev. 2), "Consolidated Guidance About Materials Licenses - Program-Specific Guidance About Medical Use Licenses." Please refer to Appendix D, "Documentation of Training and Experience to Identify Individuals on a License as Authorized User, Radiation Safety Officer, Authorized Medical Physicist, or Authorized Nuclear Pharmacist," as found in the guide for specific information that needs to be provided for proposed Authorized Users.

We request that this information be provided as soon as possible, and no later than November 13, 2013. Please provide the requested supporting information as enclosures to a dated and signed cover letter, and include the license number and control number in the letter.
