Re: Source Materials License SUA-1534
Docket No. 40-8943
Monitor Well Excursion – CM11-10

Dear Deputy Director:

On September 11, 2013¹ during routine biweekly water sampling of Cameco Resources, Crow Butte Operation (CBO) commercial monitor well CM11-10, the single control limit (SCL) for alkalinity was exceeded as well as the multiple control limit (MCL) for conductivity. As required by License Condition 11.2 of Source Materials License SUA-1534, a second sample was collected within 48 hours and analyzed for the three excursion indicator parameters. The results of the second sample exceeded the SCL for alkalinity and the MCL for conductivity.

In accordance with License Condition 11.2, CBO increased the sampling frequency for CM11-10 to weekly. Weekly samples were obtained from September 17, 2013 to November 5, 2013. The samples collected on October 1, 8, 15, 22, and 29, 2013, as well as the sample collected on November 5, 2013, were below excursion criteria described in License Condition 11.2. Based on these results, CBO is removing CM11-10 from excursion status and is returning it to routine
