Dear Mr. Schmidt:

We have reviewed the Wisconsin legally binding requirements in the draft license condition received by our office on October 4, 2013. These requirements were reviewed by comparison to the equivalent Nuclear Regulatory Commission (NRC) rules in 10 CFR Parts 20, 30, 32, 33, 34, 35, 36, 37, 39, 71 and the requirements of the one amendment identified in the enclosed State Regulation Status (SRS) Data Sheet. We discussed our review of the regulations with Cheryl Rogers on December 20, 2013.

As a result of our review, we have ten comments that have been identified in the enclosure. Please note that we have limited our review to the legally binding requirements required for compatibility and/or health and safety. We have determined that if these requirements are revised, incorporating our comments and without other significant change, they would meet the compatibility and health and safety categories established in the Office of Federal and State Materials and Environmental Management Programs (FSME) Procedure SA-200, "Compatibility Categories and Health and Safety Identification for NRC Regulations and Other Program Elements."

We request that when you revise your legally binding requirements to address our comments, a copy of the revised legally binding requirements be provided to us for review. As requested in FSME Procedure SA-201, "Review of State Regulatory Requirements," please highlight the location of any changes made by Wisconsin, in response to our comments, and provide a copy to Division of Materials Safety and State Agreements, FSME.

Additionally, please note that NRC has issued certain security Orders to two Wisconsin licensees. We have not listed the names of the licensees in this letter because that information is Official Use Only and cannot be made publicly available. Because the NRC-issued Orders are still legally binding, they must be rescinded by NRC concurrent with Wisconsin amending those specific licenses with the legally binding requirements. Accordingly, close coordination is needed between NRC and your office to ensure there are no conflicts, duplications, or gaps regarding the security-related requirements for these two licensees. Please contact Adelaide Giantelli, Branch Chief, Source Management and Protection Branch, FSME at (301) 415-3521 (adelaide.giantelli@nrc.gov) for information regarding the affected Wisconsin licensees and for coordination with rescission of the NRC-issued Orders and Wisconsin imposition of the legally binding requirement on these licensees after NRC's review of the revised legally binding requirement.

P. Schmidt

Although this definition is assigned Compatibility Category D, the term "Commission" is used in sections of 10 CFR Part 37 to mean the NRC "Commission" and not Wisconsin DHS.</p> <p>Wisconsin needs to include the definition Commission as an exception in the LBR(b) in order to avoid any conflicts, duplications or gaps.</p>
