SUBJECT: PROPOSED CHANGES TO THE SAN ONOFRE NUCLEAR GENERATING STATION SITE  
EMERGENCY PLAN AND EMERGENCY CLASSIFICATION PROCEDURE

We have received your letter dated January 12, 1995, which transmitted proposed Revision 6.1 to the San Onofre Nuclear Generating Station Site Emergency Plan and corresponding changes to Emergency Classification Procedure S0123-VIII-1, "Recognition and Classification of Emergencies." Your 50.54(q) evaluation concluded that the changes did not reduce the effectiveness of the Emergency Plan; however, the proposed changes were submitted for approval prior to implementation, because the changes involved key elements of the Emergency Plan. Proposed Revision 6.1 included the following changes: (1) emergency action levels, (2) offsite protective action recommendations, (3) emergency response facility staffing, (4) administrative, and (5) evacuation time estimates.

We have reviewed the proposed changes and have determined that, with the exception of Appendix H (Evacuation Time Estimates), which is pending further review, the changes are acceptable and do not appear to degrade the effectiveness of your emergency planning at San Onofre Nuclear Generating Station. The results of our review were discussed with Mr. Cyrus Anderson. In response to some of our comments, Mr. Anderson agreed to make the following changes: (1) Section 4.1.1.5 and Event Code C1-2 would not be deleted as proposed; (2) additional words would be added to Event Code E1-1 to clarify the term "verification"; (3) Sections 4.1.2.11 and 4.1.3.9 and Event Codes D2-3 and D3-3 would be revised to include "most or all annunciators"; (4) a change made to Table 6-4 would be restored (reference to the 5-mile Emergency Planning Zone boundary will be deleted); (5) the protective action recommendations in Table 6-4 and the accompanying caution statement will be revised to indicate that shelter should be considered, rather than mandated, for severe core damage conditions when evacuation times exceed plume exposure time; and (6) Event Codes A3-1 and A4-1 will be revised to refer to integrated doses rather than dose rates.
