Gentlemen:

Subject: Docket Nos. 50-206, 50-361, and 50-362
1995 Emergency Plan Exercise
San Onofre Nuclear Generating Station
Units 1, 2, and 3

Reference: Letter dated August 11, 1995, from W. G. Zintl (Edison) to Document Control Desk (NRC). Subject: 1995 Emergency Plan Exercise, San Onofre Nuclear Generating Station, Units 1, 2, and 3.

By letter dated August 11, 1995, (Referenced above) Edison transmitted the scenario and data for the San Onofre annual emergency plan exercise scheduled for October 11, 1995. Subsequent to transmittal, an error was discovered in the data for the "Plant data-controller" section and one graph in the "Plant data-curves" section. Enclosed are corrected pages. Please replace all of the pages of the "Plant data-controller" section and the single "RCS TEMPERATURE (REPCET, REACTOR HEAD)" curve with the enclosed pages.

These documents contain information about the exercise. To assure the security of the scenario, they should not be disclosed until after the exercise. Edison therefore requests that the enclosures not be filed or distributed to exercise participants until after October 11, 1995.

Please contact me if you have any questions.

Very truly yours,

Enclosures

RE: Revisions to the City of Dana Point Emergency Plan

Dear Sirs:

Enclosed are revisions to the City of Dana Point Emergency Plan. At your earliest convenience, please substitute the pages in your plan with these replacements. Attached is a guide to assist you in locating the pages needing replacement.

This project should take approximately 10-15 minutes to complete. If you have any questions or would like assistance in revising your plan, please call me at 714-248-3535.

Respectfully,

A handwritten signature in black ink, appearing to read "Mark R. Johnson", is written over a horizontal line.
