(TAC#12855)

The Commission has issued the enclosed Amendment No. 49 to Provisional Operating License No. DPR-13 for the San Onofre Nuclear Generating Station, Unit 1. The amendment consists of changes to the Appendix A Technical Specifications in response to your application (Proposed Change No. 88) dated February 8, 1980.

The amendment replaces the reference to cycle-specific ejected rod worths and predicted fuel centerline temperatures in Technical Specification 3.5.2 (basis) with performance criteria used in the hypothetical ejected rod accident calculations.

From considerations of the effects of normal operation, anticipated transients and postulated accidents, we find that the safety margin for Cycle 8 operation is adequate. Furthermore, the criteria proposed as part of the basis for the control rod insertion limits are acceptable.

Copies of our Safety Evaluation and Notice of Issuance are also enclosed.

Sincerely,

Original signed by

Dennis M. Crutchfield, Chief  
 Operating Reactors Branch #5  
 Division of Licensing

Enclosures:

1. Amendment No. 49 to License No. DPR-13
2. Safety Evaluation
3. Notice of Issuance.

Dear Mr. Dietch:

The Commission has issued the enclosed Amendment No. to Provisional Operating License No. DPR-13 for the San Onofre Nuclear Generating Station, Unit 1. The amendment consists of changes to the Appendix A Technical Specifications in response to your application (Proposed Change No. 98) dated February 8, 1980.

The amendment replaces the reference to cycle-specific ejected rod worths and predicted fuel centerline temperatures in Technical Specification 3.5.2 (basis) with performance criteria used in the hypothetical ejected rod accident calculations, which permits Cycle 8 operation.

From considerations of the effects of normal operation, anticipated transients and postulated accidents, we find that the safety margin for Cycle 8 operation is adequate. Therefore, Cycle 8 operation from a core performance standpoint, is acceptable as proposed.

Copies of our Safety Evaluation and Notice of Issuance are also enclosed.

Sincerely,

Dennis M. Crutchfield, Chief  
Operating Reactors Branch #5  
Division of Licensing
