Docket No. 50-206
LS05-81-03-040

Mr. R. Dietch, Vice President
Nuclear Engineering and Operations
Southern California Edison Company
2244 Walnut Grove Avenue
Post Office Box 800
Rosemead, California 91770

Dear Mr. Dietch:

The Commission has issued the enclosed Amendment No. 53 to Provisional Operating License No. DPR-13 for the San Onofre Nuclear Generating Station Unit No. 1. This amendment consists of changes to the Technical Specifications in partial response to your request (Proposed Change No. 94), dated October 15, 1980.

The amendment modifies the Appendix B (Environmental) Technical Specifications to delete Sections 3.1 "Nonradiological Surveillance", 4.1 "Chlorine", 4.2 "Fish Impingement" and 4.3 "Entrainment" which contain monitoring programs for the protection of the aquatic environment. The NRC will rely on the requirements of the effective National Pollutant Discharge Elimination Systems (NPDES) Permit issued by the State of California for the protection of the aquatic environment.

The remainder of your requests of February 8, and October 15, 1980, will be incorporated into a total revision of your Appendix B (Environmental) Technical Specifications. This revision will move the nonradiological requirements to an Environmental Protection Plan (EPP) which will be Part II of Appendix B. The EPP will extend our reliance on the NPDES Permit for all aquatic controls and will specify reporting requirements to assure that the NRC remains aware of potential impacts to this segment of the environment.

We have determined that this amendment is a ministerial action required as a matter of law and, therefore, an environmental impact statement or negative declaration and an environmental impact appraisal need not be prepared in connection with the issuance of this amendment.

Mr. R. Dietch

- 2 -

This amendment does not involve significant new safety information of a type not considered in previous Commission safety reviews of the facility. It does not involve a significant increase in the probability or consequences of an accident, does not involve a significant decrease in a safety margin, and therefore, does not involve a significant hazards consideration. We have also concluded that there is reasonable assurance that the health and safety of the public will not be endangered by this action.

A copy of the related Notice of Issuance is also enclosed.

Sincerely,

Original signed by

Dennis M. Crutchfield, Chief
Operating Reactors Branch #5
Division of Licensing
